Setting Up Your Remote
Installing the Battery
Press the battery cover release button to open the battery cover and carefully lift the cover as shown.

Insert the supplied battery, making sure the positive (+) and negative (-) end of the battery match the polarity indicators inside the battery compartment.
Remove the mini USB receiver stored inside the center compartment.

Slide the battery cover back into position until it “clicks” firmly into place.

Using Your Remote

Before using the remote, please select your computer type and preferred presentation software. Locate the switch inside the battery compartment as shown.

NOTE: SELECT “PC POWERPOINT” IF YOU USE A COMPUTER MADE BY: HP/COMPAQ, DELL, TOSHIBA, GATEWAY, PANASONIC, FUJITSU, SONY, IBM/LENOVO, ACER, ASUS, ETC.
This remote is a plug and play device. It will automatically operate when the USB receiver is connected to the computer. Plug the mini USB receiver into any available USB port on your computer.

Turn on the remote by pressing and holding the On/Off power button for 3 seconds.
### Safety Measures

- To avoid possible eye damage, never point the remote's laser at people, especially their faces, or look directly into the remote's laser beam.
- Avoid pointing the remote's laser beam at a mirror or other highly-reflective surface.
- Keep the remote away from young children.
- Never view the remote's laser beam using telescopic devices, such as a microscope or binoculars.
- Any attempt to disassemble, adjust or repair the remote may result in exposure to laser light or other safety hazards.

### Troubleshooting

**What do I do if the response time of the remote is slow or it intermittently stops working?**

- Make sure that the remote is within 50 feet (15 m) of the mini USB receiver and computer.
- Increase the distance between the remote's receiver and the base units of other wireless devices.
- Turn off any wireless devices and their base units that are near the remote's receiver.
- Replace the battery.
